**VIEGA INTRODUCES MEGAPRESS®G FITTINGS IN LARGER SIZES**

*New offerings extend the range of MegaPressG fittings up to 4"*

BROOMFIELD, Colo. – (Feb. 3, 2020) – Viega’s MegaPress®G press fitting technology is now available for carbon steel pipe up to 4". Three new fitting sizes will be featured at the Viega booth (#1943) at AHR Expo, Feb. 3-5, in Orlando.

Viega, the leader in press fitting technology, is introducing MegaPressG fittings for 2½", 3" and 4" pipe. The new fittings join the current MegaPressG offerings of ½" to 2" fittings to create a comprehensive lineup of fittings approved for use in gas and fuel oil applications. And it’s the only system on the market that allows secure press connections on gas lines 2½" to 4" in 16 seconds or less.

Constructed of carbon steel with a corrosion-resistant zinc nickel coating and first-of-its-kind graphite separator ring in larger sizes, MegaPressG is suitable for use with ASTM Schedule 5 to Schedule 40 carbon steel pipe.

Using MegaPressG means no open flames, faster connections and labor savings, resulting in safer and more efficient projects that come in on time and on budget. It can reduce labor costs by as much as 60% to 90% over traditional methods.

Configurations include elbows, couplings, no-stop couplings, reducers, tees, reducing tees, adapters, reducing adapters, caps and flanges.

Combining productivity with peace of mind, MegaPressG fittings are equipped with the patented Viega Smart Connect® technology, which allows installers to easily identify unpressed connections during pressure testing. And

MegaPressG fittings offer the same proven quality and durability as all Viega products, bringing complete confidence to every job.

“Since Viega first introduced MegaPressG fittings, customers have been asking for them in larger sizes,” said William Dutcher, Viega Product Manager for Metals, IPS. “The new fittings will allow customers to experience the time savings and consistent quality connections on an even greater number and variety of jobs.”

### **About Viega**

The Viega Group, with a tradition of innovation for 120 years, has more than 4,000 employees worldwide and is among the leading manufacturers of pipe fitting installation technology. In metal press systems for industrial, commercial and residential projects, the company is the global market leader. In the U.S., Viega LLC employs over 650 people and offers more than 3,000 products. These include Viega ProPress® for copper and stainless, Viega MegaPress® for carbon steel and stainless pipe, the Viega PureFlow® System including PEX and fittings in high-performance polymer and Zero Lead bronze, as well as MegaPress CuNi and SeaPress® systems for marine applications. Viega also specializes in the design, production and installation of radiant heating and cooling systems, and offers Viega Flushing System Technology including carriers and flush plates.
