Viega Expands FKM Sealing Element Offerings

Products to be displayed at AHR Expo

BROOMFIELD, Colo. (Feb. 3, 2020) – Viega LLC is introducing new sizes for its MegaPress® FKM line, while also adding an all-new MegaPress® 316 FKM line.

Both systems of additional MegaPress FKM fittings will be on display at Viega's booth (#1943) at AHR Expo, Feb. 3-5, in Orlando, Fla.

MegaPress FKM is now available in ½" to 4" fittings for carbon steel pipe. It's suitable for renovations, repairs or installation of new carbon steel pipe systems. It's approved for use in hydronic heating, compressed air, fire protection, cooling water, marine applications and more. It can even be installed on noncombustible/nonflammable lines that are not completely shut down, eliminating the need to fully drain a system, which shortens repair and installation time.

Viega was the first to introduce stainless steel press fittings for Schedule 10 to Schedule 40 piping systems with its launch of MegaPress 316 (with an EPDM sealing element). With the introduction of MegaPress 316 FKM fittings, Viega increases its stainless steel configurations by more than 150 SKUs. MegaPress 316 FKM is suitable for use with hydronic applications, compressed air, industrial gases, marine applications and excels in harsh environments. Available in sizes ½" to 4", it saves labor cost and system downtime.

Both products are offered in configurations including elbows, couplings, no-stop couplings, reducers, tees, reducing tees, adapters, unions, caps and flanges.

The new fittings come with Viega's patented Smart Connect® technology, which makes it easier to help identify unpressed connections.

###

About Viega

The Viega Group, with a tradition of innovation for 120 years, has more than 4,000 employees worldwide and is among the leading manufacturers of pipe fitting installation technology. In metal press systems for industrial, commercial and residential projects, the company is the global market leader. In the U.S., Viega LLC employs over 650 people and offers more than 3,000 products. These include Viega ProPress® for copper and stainless, Viega MegaPress® for carbon steel and stainless pipe, the Viega PureFlow® System including PEX and fittings in high-performance polymer and Zero Lead bronze, as well as MegaPress CuNi and SeaPress® systems for marine applications. Viega also specializes in the design, production and installation of radiant heating and cooling systems, and offers Viega Flushing System Technology including carriers and flush plates.
